

Homework 8

Due, May 24th 11:59pm.

Since we're two weeks away from your final project this homework assignment will be simple. Find a county dataset that would be suitable for a choropleth map and make a county map with mouseover in D3.

Explain your choice of color scale and the breaks that you used in the data. Don't forget to include a key. Reminder to pay close attention to labelling, source lines and headlines in the piece as well.

Publish your graphic onto github. And please submit your homework as a PDF with the link to the graphic and explanation.
